

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Dynamic

Legal entity identifier:
54930004F5ZUL53NC758

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☒ ☐ ☐ **Yes**

☐ ☐ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective: __%**;

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective: __%**

☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of __% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☒ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

The fund has the following specific aims:

- A carbon reduction ambition to reduce the carbon intensity of investee companies by 25% versus 2019 levels.
- The exclusion of activities from the fund that are irreconcilable with Zurich's, sustainability strategy. The exclusion criteria cover activities in thermal coal, oil sands and oil shale. Zurich has also engaged in divestment from investee companies that derive greater than 30% of their revenues from mining thermal coal or generate more than 30% of their electricity from coal. The criteria also exclude investment in companies which produce, stockpile, distribute, market, or sell banned cluster munitions or anti-personnel landmines.

In addition, the fund:

- Integrates ESG factors into the investment process. ESG integration is an approach in which information on environmental, social and governance metrics are used systematically as an integral part of the process to select securities or assets for actively managed portfolios. ESG integration is an approach that is focused on those ESG factors that are deemed economically material, i.e. deemed to impact the risk and returns associated with the assets in which we invest. ESG factors impact the bottom line: integrating them into the investment process will support us in delivering better risk-adjusted returns in the long run. ESG integration helps us to 'do well'.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• Active ownership through exercising shareholder votes and engagement with investee companies. Zurich considers active ownership an essential aspect of driving a sustainable world. Zurich undertakes active ownership of its investee companies through exercising shareholder voting rights and engaging with investee companies directly. Voting is executed across Zurich's directly managed equity portfolio with agreed approaches across a wide range of issues on corporate governance and other key ESG factors with full voting records publicly available online. On engaging with investee companies Zurich has put in place a framework to engage with some of the largest carbon emitters through direct meetings. This combination of active engagement and active voting is recognised as a key feature of responsible investing.

A reference benchmark which would promote Environmental and/or Social characteristics has not been designated for the fund.

The fund does not make a minimum commitment to invest in sustainable investments.

• **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The attainment of the environmental and social characteristics promoted by the fund are measured periodically, they are measured using the following sustainability indicators:

- Voting records and statistics
- Engagement records and summary findings
- Assessment of carbon reduction vs the reduction ambition
- ESG score outliers and controversies
- Principle Adverse Indicators are calculated and monitored periodically
- Companies that are in violation of the UNGPs (United Nations Guiding Principles) or OECD (Organisation for Economic Co-operation and Development) Guidelines for Multinational Enterprises
- The restricted list for equities and credit, based on Zurich's exclusions policy, which is updated periodically

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes, The fund considers principle adverse impacts through a framework to identify and assess those impacts. For environmental characteristics examples of these include:

- Greenhouse Gas emissions

- Carbon footprint
- Hazardous waste ratios

For social characteristics these include:

- Exposure to controversial weapons
- Gender pay gap and board gender diversity
- Adherence with the UN Global Compact

For governance characteristics these include:

- Corruption and bribery matters
- Inadequate governance
- Tax evasion
- Breaches of regulation, international norms and conventions

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Dynamic Fund is an actively managed fund which aims to achieve growth through capital gains and income from a well-diversified global portfolio of quality equities and equity-based financial instruments. The indicative equity range is 75% - 100% of the value of the fund. Zurich identifies and prioritises adverse impact indicators as part of Zurich's responsible investment and sustainability risk strategy, with the help of data and analysis provided by third party providers.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements are as follows: A minimum proportion of 80% of the funds value in assets which are designated as promoting environmental and/or social characteristics or are sovereign bonds/cash are committed to the allocation. The fund has no minimum share of investments that are aligned with the EU Taxonomy. The fund applies certain exclusions, and the equity and credit portfolios within the fund are subject to Zurich's carbon reduction ambition, shareholder votes are exercised using a proxy voting service, the top polluters within equity and credit are engaged with to encourage investee companies to follow explicit science-based targets for carbon reduction, Zurich is a signatory to the UN Principles of Responsible Investment and the UN Global Compact, Zurich is a founding member of the Net Zero Asset Owner Alliance and the Climate 100 action group.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate of reduction applicable to the fund prior to the application of the fund's investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

• **What is the policy to assess good governance practices of the investee companies?**

Zurich only invests in securities traded on regulated markets. In addition to this, Zurich considers good governance criteria which relate to sound management structures, employee relations, remuneration of staff and tax compliance. Zurich uses 3rd party data, active ownership, and analysis of investee company disclosures to identify potential governance issues. In cases where insufficient levels of governance are identified, Zurich has an escalation process to review the issues in detail and ascertain whether management of the investee company are taking steps to rectify the issues. Where governance issues are not rectified to a sufficient standard within an acceptable time period, Zurich will divest from these companies.

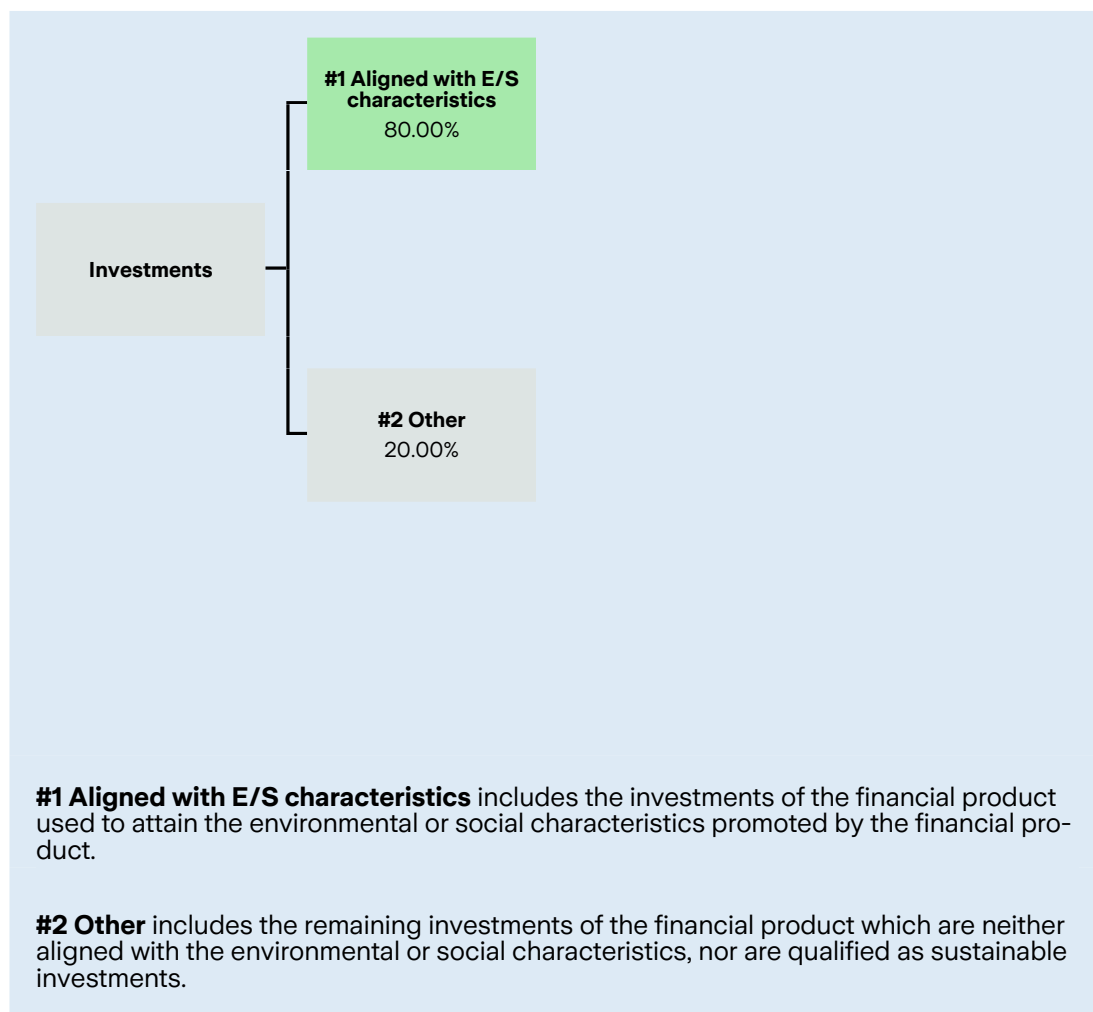

What is the asset allocation planned for this financial product?

The fund commits to investing 80% of the funds value in assets which are designated to promoting environmental and/or social characteristics or are sovereign bonds/cash (category #1 in the below table). The fund has no binding commitment to make sustainable investments as defined in EU Regulation 2019/2088. The asset allocation within the fund changes on a daily basis based on market movements and the active investment decision of the Zurich investment team. The equity and credit allocations within the fund represent investments which are aligned with environmental and social characteristics.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

• **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The fund does not utilise derivative contracts to explicitly attain or promote any environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

There is no minimum share of investments that are aligned with the EU Taxonomy.

• Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?

☒ Yes:

☒ In fossil gas

☒ In nuclear energy

☐ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

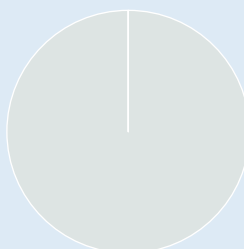

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

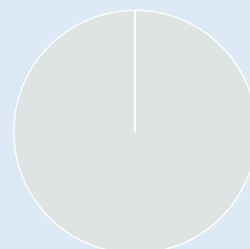

Taxonomy-aligned (no fossil gas & nuclear): **0%**
Non Taxonomy-aligned: **100%**

Total Taxonomy-aligned: **0%**

2. Taxonomy-alignment of investments excluding sovereign bonds*

Taxonomy-aligned (no fossil gas & nuclear): **0%**
Non Taxonomy-aligned: **100%**

Total Taxonomy-aligned: **0%**

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

• What is the minimum share of investments in transitional and enabling activities?

There is no minimum share of sustainable investments that are not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The fund invests solely in equities, bonds, and cash. There are no alternative assets (such as commodities or property) within the fund.

Where can I find more product specific information online?
